

A SKIN CARE ESSENTIAL

UNDEW Peptide Toner was developed after many years of research. It is specially formulated to stimulate, tone and rehydrate the skin after cleansing. It does not contain alcohol so it's non-drying. It absorbs quickly giving your skin a cool and hydrated lift. Like our UNDEW Facial Serum, it is fragrance and paraben-free and designed for all skin types.

It is proven that serums work better and their benefits enhanced when applied to moistened skin. By misting your face with UNDEW Peptide Toner, you are priming your skin and better preparing it for the application and absorption of your UNDEW Facial Serum.

**Two products working together
to create a more perfect you.**

KEY INGREDIENTS

- An essential mineral, rich in copper that increases collagen and elastin synthesis.
- A botanical blend that helps soothe and moisturize.
- Peptides that inhibit the formation of wrinkles and lessen the appearance of deep expression lines.
- ENZACTA's own anti-glycation formula with proven anti-aging benefits.
